

Onvoy Extends Caller Name Services with TARGUSinfo

Leading Wholesale Telecom Provider Signs Multi-Year CNAM Services Contract and Switches to New CNAM Storage Solution

VIENNA, Va., and MINNEAPOLIS, MN, October 12, 2009 — Every day, more than 1,000 people per second in North America are on their phones asking TARGUSinfo one of the most basic questions — Who's calling me?

TARGUSinfo, the authoritative source and fastest growing caller name (CNAM) provider delivering more than 50 billion caller names annually, announced that Onvoy Voice Services, a Zayo Group company, has renewed a multi-year agreement to provide next generation caller name services. The new agreement provides Onvoy with both the highest quality CNAM service and economical CNAM storage so that Onvoy CNAM listings are more accessible to nationwide providers.

"Offering caller identification services with the widest coverage and accuracy is a necessity for providers of all types and sizes," said Fritz Hendricks, president, Onvoy Voice Services. "With TARGUSinfo's authoritative CNAM model we are able to improve the quality of CNAM delivered while containing the cost of data. Our new and existing customers experience high quality, competitive CNAM service."

TARGUSinfo provides its unique CNAM repository model to more than 180 customers, including leading MSO, VoIP, ILECs, CLECs and wireless operators.

"For many providers, attempting to keep up with the rapid changes in CNAM data in 2009 is like trying to take a sip from a fire hydrant through a straw," said George Moore, CEO and chairman, TARGUSinfo. "We have dedicated the past 15 years to building the most robust and accurate repository of more than 410 million records that continuously updates, in real time, with the changes in consumers fast pace and transient lifestyles."

The Most Accurate and Up-to-Date CNAM Records Available

TARGUSinfo's authoritative CNAM repository of more than 410 million CNAM records sourced by telecommunications companies, allows unique benefits such as standardized display, flexible pricing model and multiple connectivity options.

In a 2008 report by The Paisley Group, the TARGUSinfo CNAM service was found to be superior to traditional network CNAM in coverage and accuracy of caller names delivered.

To learn more about TARGUSinfo CNAM services or to download Paisley Group report, visit www.TARGUSinfo.com/CNAM.
