

ZAYO ENTERPRISE NETWORKS USES BUSINESS COMMUNICATIONS SERVICES TO HELP PROPERTY MANAGERS ATTRACT TENANTS

Zayo to Exhibit at the BOMA Memphis Commercial Buildings EXPO to Showcase this Solution

(Memphis, TN) October 21, 2009: Zayo Enterprise Networks, a division of Zayo Group and a provider of fiber-based telecommunications solutions for business, government and education, will be exhibiting today at the Building Owners and Managers Association (BOMA) Memphis Commercial Buildings Expo to discuss how communications services may help fill commercial property vacancies.

Zayo's metro area network provides high-quality, high-speed voice, Internet and data solutions to businesses and organizations throughout the Memphis area. One property that has already taken advantage of these services is Lenox Park, who leverages Zayo's communications services as a kind of "fourth utility" to offer their tenants. The management team provides their occupants with secure, scalable Internet access at no cost—greatly increasing the value their tenants receive for their real estate dollar.

"We have found that our tenants at Lenox Park have been very receptive to having their Internet communications included with their lease rather than sourcing it themselves at an additional cost," said Dan Chancey, General Manager at Grubb and Ellis Management Services. "When we built our fiber infrastructure at Lenox Park, we knew we'd need a communications provider we could rely on and we're happy to have Zayo as a partner."

By attending the BOMA expo, Zayo hopes to make others aware of the value-add potential inherent within these types of communications solutions.

"We've been providing services to Lenox Park since 2006 and are very proud of the relationship we've developed during that time," said Garner Bailey, General Manager for Zayo's Memphis market. "We are pleased to show our support by exhibiting here at the BOMA Memphis Expo and look forward to meeting with other members of the local BOMA community."

About Zayo Enterprise Networks
