

GIS Developer Louisville, Colorado

Zayo is a fast growing facilities-based telecommunications service provider located in beautiful Louisville, Colorado – *Money Magazine's* "Best Place to Live" for 2009. Zayo is seeking a GIS developer to join its IT department to assist with building our fiber mapping and inventory application within Salesforce.com.

The successful candidate will be working extensively with Postgres, Geoserver, and Force.com creating add-on applications that integrate into the main Salesforce application. Force.com is Salesforce.com's Platform-as-a-Service product. These add-ons are built using Apex (a proprietary Java-like programming language for the Force.com Platform) and Visualforce (an XML-like syntax for building user interfaces in HTML, AJAX or Flex).

Salesforce.com is core to Zayo's architecture and fundamentally supports the company's overall business strategy. In addition, as a leading-edge user of Salesforce.com, Zayo works in partnership with the Salesforce.com development team to leverage Google Earth and other web based software to dramatically extend the capabilities of the platform.

Responsibilities for this position include some or all of the following: (i) Design and Implementation of software solutions to meet Stakeholder needs; (ii) Quality Assurance of Software implementations; (iii) Full lifecycle support of Software Solutions, including Production Support; (iv) Configuration Management/Version Control of software artifacts (code, models, documentation)

Ideal Candidate Will Possess Many of the Following Traits, Skills & Experiences

- Passionate about Application Development
- Agile Software Development Methodology practitioner
- Desire to work in a fast paced environment where skill sets will develop quickly
- Salesforce.com application development experience or strong desire to learn Salesforce.com to support Zayo's end to end OSS/BSS platform
- Ability to install, configure, and support Postgres databases and Geoserver
- Google Earth experience or strong desire to learn Google Earth
- Flex and/or Force.com (Apex, Visualforce) or Net/ASP.Net, Java
- Eclipse, Visual Studio or other Intelligent Development Environment (IDE)
- Strong interpersonal skills and an ability to interact effectively with all personnel and customers
- Knowledge of telecommunications OSS/BSS systems
- Service Oriented Architecture (SOA) literate
- Knowledge of Design Patterns including Gang of Four (GoF), GRASP, MVC
- Computer Science Bachelor's degree or equivalent work experience

What Zayo has to Offer?

- Zayo is a profitable and rapidly growing company.
- Zayo will facilitate candidate discussions with Salesforce.com personnel to allow them to get an independent understanding of Zayo's innovative approach.
- The Zayo IT staff is building their skills sets at an accelerated pace, enhancing their career path.
- Zayo's investors are the "who's who" of telecom and Internet investing. Zayo's innovation with Salesforce is recognized throughout the industry.
- Zayo's CEO and executive team is passionate about Zayo's IT effort and credits the platform as integral to Zayo's current success.
