CYBER SECURITY

CONTEXTUAL, ACTIONABLE AND PROACTIVE SECURITY INTELLIGENCE TO PROTECT YOUR BUSINESS

BENEFITS

- 24x7x365 continuous monitoring, change management, and response
- Security Intelligence from 160+ sources across 100 different indicator types
- SIEM management, configuration and customization
- Compliance reporting and log retention
- Tailored approach to security that fits your business

Protect your business from real time, persistent threats

Any intellectual property, customer, and employee data is a target. The tactics threat actors employ to access this information are always changing, and so is their ammunition. Only a continually evolving security action plan can truly protect you against emerging threats to your business. Zayo's security experts work with you on a tailored security design freeing you to focus on your business. By leveraging our people, processes and market-leading technologies, we can offer contextual and actionable security intelligence to many different market

segments. Through a mix of strategic partnerships with security leaders, and our decades of front-line experience in security management, Zayo offers innovative security solutions with meaningful data to help protect your business.

OUR CYBER SECURITY PORTFOLIO INCLUDES:

Advanced Threat Management

Zayo's Global Enterprise Security Operations Centre (GSOC) was built with purpose to meet physical and network security compliance standards demanded by highly regulated industries, like government, financial, healthcare and telecommunications.

Our continually-evolving security intelligence platform leverages over 160 different threat sources with over 100 different Indicators of Compromise (IoC) types to provide actionable early warning information to protect your organization against both known and emerging threats and vulnerabilities.

Managed Security Services

Zayo is an extension of your security staff assisting organizations to prevent, detect, and respond to advanced malicious threats. With over 20 years of managed security experience specializing in firewalls and NGFWs, Content and Web Filtering, Authentication and Identity Management, Cloud Security, and Encryption, from fully managed to co-managed to self-managed.

Professional Services

Zayo offers a comprehensive suite of information security consulting services which deliver the people, technology, global threat visibility, and security expertise organizations can use to augment their inhouse security resources. Our consultants are well versed in industry standards and regulatory compliance requirements. We work with you to effectively and efficiently manage the risks to your business.
