

Critical data and business success increasingly depend on the quality of network connections. With companies shifting to remote and hybrid work environments, embracing bandwidth-hungry applications and moving data to the cloud, now more than ever the Internet must provide the highest levels of availability and reliability to support mission-critical business functions.

Zayo's Tier-1 Dedicated Internet Access (DIA) is engineered to deliver the reliability, security and performance you need. Upgrade your Internet connectivity with Zayo's fiber-based, guaranteed bandwidth.

Half of Fortune 100 companies trust Zayo with their IP service

Zayo's IP products serve **4,420+ companies globally**

CAIDA Top 10 ranked Tier-1 Internet provider

PRODUCT BENEFITS

Zayo's Tier-1 Internet Backbone Provides the Best IP Experience

- Faster installation of IP service
- Traffic bursting capabilities
- Operational simplicity with a single provider
- Faster diagnosis and repair should anything go wrong
- SLAs with service guarantees informed by historical performance
- Faster growth with immediate access to additional bandwidth

User Experience

- Receive the network, scale and peering of a large provider – with the customer service and flexibility of a local provider.
- Access 24/7/365 support and service from our Network Operations Center (NOC), and benefit from around-the-clock network management from our self-service customer portal, Tranzact.

Scalable & Customizable Bandwidth

- Aggregate your committed bandwidth across all locations.
- Easily add more locations and bandwidth to your service, and grow seamlessly, from 100 Mbps to 100 Gbps.
- Layer multiple solutions using a single Ethernet access.
- Choose from flexible flat-rate, on-demand or usage-based billing.

Superior Internet Performance & Reliability

- Receive guaranteed bandwidth with a dedicated connection to the Internet – ensuring your high-speed connectivity remains high speed.
- Benefit from Zayo's intelligent Internet network design, reducing latency and outages caused by inefficient traffic routing.
- Achieve symmetrical upload and download speeds without restrictions.

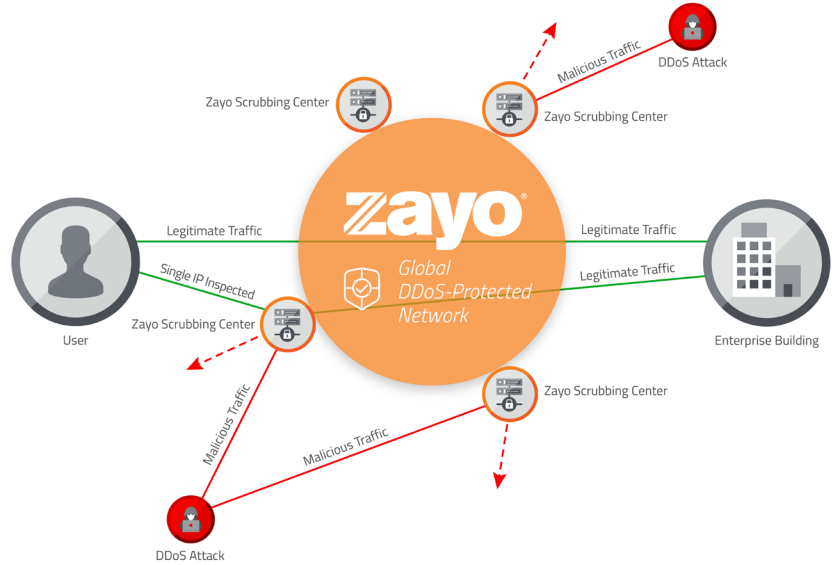

COMPREHENSIVE NETWORK PROTECTION

Protect your entire network from attacks, with minimal added latency. **Bundle Zayo’s Dedicated Internet Access and DDoS Protection for:**

Superior Network Defense: Advanced detection and mitigation technology shields from DDoS attacks by redirecting malicious traffic only to one or more scrubbing centers on Zayo’s network.

Cost-Effective Network Protection: Reduce operating costs and network complexity with Zayo’s cloud-based DDoS Protection; one service protects multiple circuits and locations.

Customizable Network Security: Scalable and flexible protection including authorized, automated and self-mitigation options.
