

The financial sector is undergoing a digital transformation driven by massive innovations, new technologies and shifting customer expectations.

**As financial organizations respond to the global changes, they are faced with significant challenges:**

- Transmitting enormous amounts of data in real time
- Surpassing the competition to close trades and meet fill rates
- Securing high-priority applications to meet strict industry regulations
- Implementing successful business continuity and disaster recovery plans for maximum service and operational uptime

A quality and reliable service is critical for companies looking to gain a competitive edge.

### BENEFITS

#### Speed & Performance

- Leverage the most direct and lowest latency routes between key financial institutions and trading exchanges, built for the most demanding requirements of the financial sector.
- Connect between major financial hubs around the world with Spread Networks by Zayo– the fastest, newest and most reliable financial network.
- Reduce deployment timeframes with full turnkey pricing solutions.

#### Scale & Meet Demand

- Meet evolving connectivity requirements and growing bandwidth demands with high-capacity, dedicated lit and dark fiber networks.
- Account for one-time events, such as a spike in trading volume, and cost-efficiently handle consistent growth over time.

#### Security, Failover & Business Continuity

- Maintain fully functional networks with 100% diversity and 99.999% uptime, even in the event of catastrophe.
- Protect transactional and customer data with comprehensive network security, including DDoS Protection, Encryption, Firewall and private connectivity to public clouds.

#### Global Infrastructure

- Connect between headquarters, branch offices and data centers with SD-WAN, MPLS, Ethernet, IP Solutions and Wavelengths.
- Benefit from deep metro and long haul networks in key financial markets including 13 high-traffic financial exchanges connected with Zayo-owned fiber.
- Access the gateway to Asian Trading Exchanges with the lowest latency connectivity to West Coast cable landing stations available.
