

# Finance

## The financial sector is undergoing a digital transformation driven by massive innovations, new technologies, and shifting customer expectations.

As financial organizations respond to global changes, they face numerous challenges. A mixture of the Great Migration and massive layoffs created gaps in IT staff to help with digitization efforts. The shift to cloud brings an increased need for security, fraud prevention, and the challenge of transmitting enormous amounts of data in real time. **Ensuring a seamless transition for customers** during this period of rapid innovation while **staying in compliance in a frequently changing regulatory environment** is crucial.

Financial companies seek accessible, scalable solutions to improve customer's digital experience and increase security. Zayo provides **secure, low-latency connectivity to global commerce centers, key financial exchanges, and liquidity venues globally**. Expand and diversify your core networks, increase your capabilities at the edge, improve access to liquidity, assist with workflow distribution between your core data centers and the cloud, create efficiencies, and improve resiliency.

### Trusted Partner of World's Largest Financial Firms
