

Your path toward Digital Transformation demands instant, automated responses from your vendor. Zayo APIs provide just that, eliminating inefficiencies and creating a direct impact on your business results.

Zayo makes it as easy as application-to-application communication with our customer portal. This robust API capability utilizes your in-house systems for service quoting, ordering, ticketing, inventory management and change management.

We've built flexible workflow patterns, working with you to identify the best integration strategy.

A further benefit to you: Zayo's APIs are integrated with the major neutral API integrators, who can provide pricing across multiple vendors. As your Digital Transformation elevates your business through automation, Zayo, your trusted network partner, is ready to help.

## BENEFITS

### Network Discovery APIs – Know What's Available Out There

Analyze how Zayo's network availability powers your business footprint via our Building Validation, Locations, and Cloud Service Providers APIs.

- Validate the address(es) of your building(s) to understand your fiber networking options
- Discover the Zayo services available at your sites
- View cloud providers and their capabilities per building and cloud on ramp.

### Quote & Order APIs – An Integrated Online Experience

Streamlined shopping! Grow your business quicker by leveraging Zayo products with our Product Catalog API, generating quotes with our Quoting API, and automating the ordering process with our Order API.

- View Zayo's product catalog and attributes
- Create and edit quotes for Ethernet, IP, Wavelengths and CloudLink services
- Identify your billing account, critical contacts, and then order your quote.

### Service Management APIs – Zayo Services Available Within Your System

Retrieve, get support, and keep track of your critical services - end to end.

- Retrieve all active service data and filter to your preferences.
- View all tickets and submit a ticket for your Zayo service direct from your ticketing or service monitoring system.
- Monitor upcoming outages and receive push notifications during Maintenance Events

All available from Zayo's new API Developer Portal, your one-stop-shop for automation!

	Network Discovery	Quote to Activation	Support Service Management
<b>Customer goal</b>	Analyze how Zayo's network availability powers your business footprint.	Grow your business capabilities and expand your network.	Retrieve, get support, and keep track of your critical services - end to end.
<b>With this API you can:</b>	<ul style="list-style-type: none"> <li>• Validate Building Addresses</li> <li>• View Location Details</li> <li>• <i>View additional offerings (DDoS, SD-WAN) and bundled services*</i></li> <li>• <i>Access KMZs*</i></li> </ul>	<ul style="list-style-type: none"> <li>• View the Product Catalog</li> <li>• View the Product Details</li> <li>• Generate a Quote</li> <li>• Create the order</li> <li>• Change your bandwidth on-demand</li> <li>• <i>Generate a MEF POQ and Quote*</i></li> <li>• <i>Receive on-demand LOA/CFA*</i></li> <li>• <i>Create a MEF Sonata v7 Order*</i></li> <li>• <i>AWS and Azure CloudLink Auto-Provisioning*</i></li> <li>• <i>IP Auto-Provisioning*</i></li> </ul>	<ul style="list-style-type: none"> <li>• View ticket catalog and details</li> <li>• Generate tickets and ticket comments</li> <li>• Monitor and get notifications on scheduled maintenance events on impacted circuits</li> <li>• <i>Get Ticket Notifications*</i></li> </ul>
<b>Services Supported</b>	<ul style="list-style-type: none"> <li>• Ethernet Services</li> <li>• IP Services</li> <li>• Wavelength Services</li> <li>• CloudLink Services</li> </ul>	<ul style="list-style-type: none"> <li>• Ethernet Services</li> <li>• IP Services</li> <li>• Wavelength Services</li> <li>• CloudLink Services</li> </ul>	<ul style="list-style-type: none"> <li>• Ethernet Services</li> <li>• IP Services</li> <li>• Wavelength Services</li> <li>• CloudLink Services</li> <li>• Dark Fiber Services</li> <li>• Colocation Services</li> </ul>

## BENEFITS OF ACCESSING ZAYO USING THIRD PARTY API INTEGRATORS

If you don't have developer resources in-house, building APIs with Integrators is a great option! You'll access not only Zayo pricing, but you'll also be able to compare the services of numerous vendors through a single interface.

### Simple:

A single developmental interface connects you to multiple vendors.

### Efficient:

Clearinghouse software works with your current systems.

### Flexible:

Elastic workflows mean you can build flexible integrations.

### Automated:

Immediately understand pricing and availability of service across many providers

### Accurate:

The most updated vendor pricing information is accessed directly.
