

THINKING ABOUT
**Network
 Readiness**
 like a CIO

We spoke to IT leaders and decision-makers to better understand how they view network readiness.

40% of leaders feel their network infrastructure is ready for emerging technologies

69% of leaders said their current infrastructure is hybrid on-premises and cloud IT leaders expect this to be replaced by multi-cloud and public cloud

0% of IT leaders surveyed are or intend to be purely on-premises

“Three to four years ago, 80% of our workload was on-prem. Now about 30% is on-prem. So that’s huge progress, but there are still underlying challenges with the infrastructure.”

CIO, HEALTHCARE COMPANY

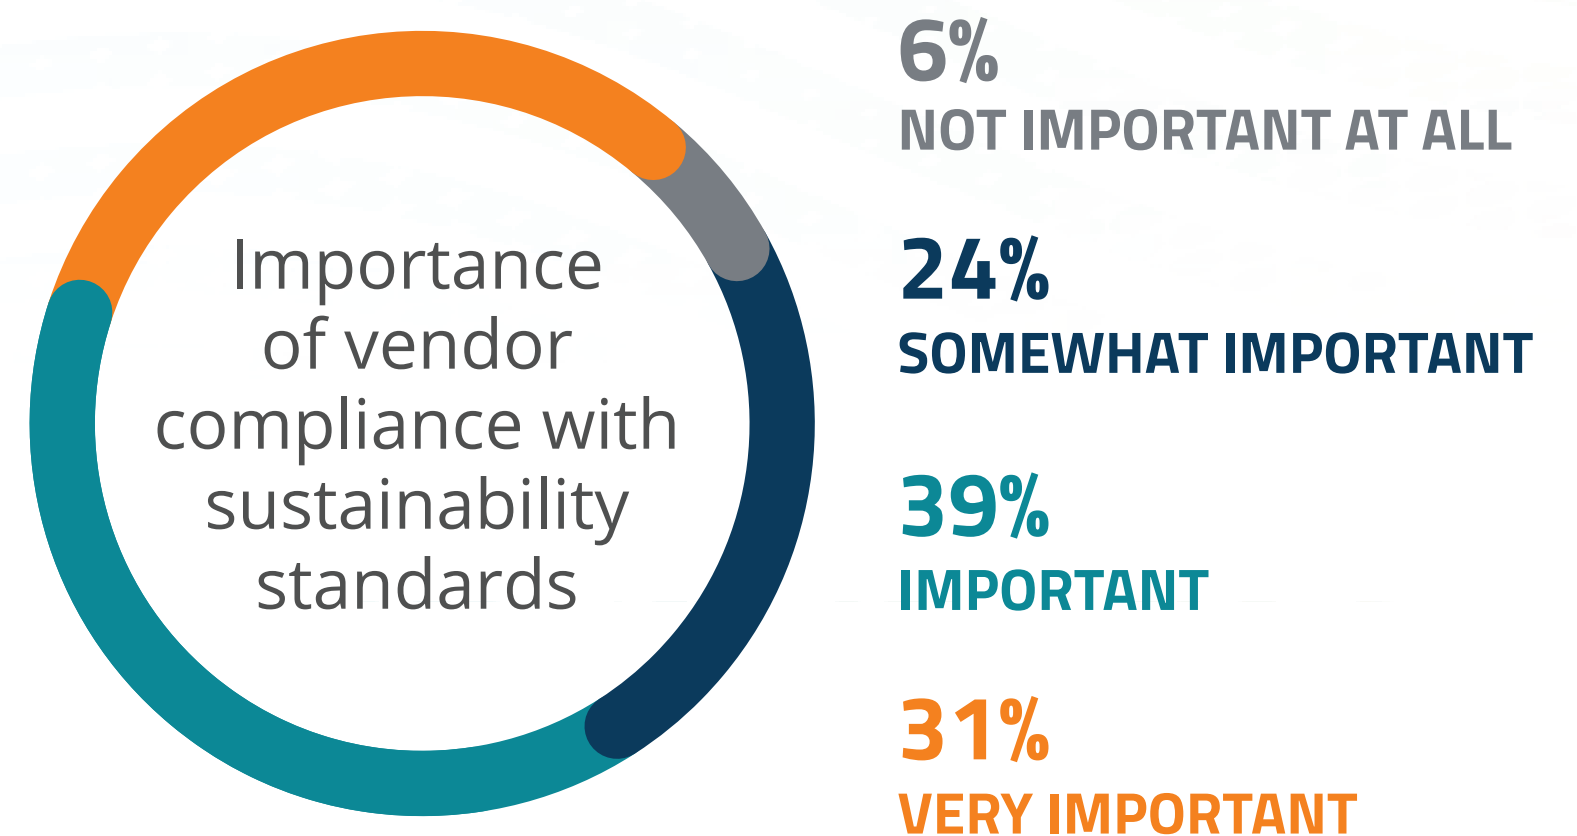

“We are 100% a cost center, but with IT infrastructure moving things to the cloud and focusing on customer experience — that’s a revenue driver.”

CIO, AUTOMOTIVE DISTRIBUTION AND RETAIL COMPANY

90% of leaders focus their vendor evaluations on compliance with security standards

Almost **1/3** say compliance with sustainability standards is important

“Almost every conversation we have with the CIO focuses on security concerns. How am I protecting my stuff? These are some of the critical pieces that are going to go in on the infrastructure.”

LARGE DEALS LEAD, TECH CONSULTING COMPANY

See what else today’s IT leaders have to say about network infrastructure and more.
