

Federal, Provincial & Local Governments across Canada are modernising and strengthening the country's digital infrastructure, accelerating cloud adoption and introducing new digital tools to improve constituent and citizen experience.

With this innovation comes challenges: integrating legacy technologies, meeting compliance requirements, containing costs, scaling for the future, shortening deployment timeframes and protecting valuable data.

As the leading partner and supplier of communications infrastructure to the Canadian Public Sector, Zayo is pleased to offer a suite of networking solutions and integrated security services that gives the Government of Canada a unique opportunity to transition to a cost effective, future-proofed, reliable and secure digital infrastructure. Our network connects to more than 400 markets across North America, Latin America, Europe and Asia leveraging multiple diverse and low latency cross-border fibres and transpacific and transatlantic routes.

Zayo has built a **distinct sovereign network**, keeping your data within Canadian control

Zayo is a strategic Partner on the **GCNET, CNS and IIS contract vehicles**

400+ security-cleared Zayo employees throughout Canada

Zayo operates dense **Metro Fibre Networks** in Ottawa, Toronto, Montreal, Quebec City, Halifax & Vancouver

NETWORKING SOLUTIONS

Modernise Your Network

- Equip your network with scalable bandwidth up to 400 Gbps.
- Provide the fastest Internet access for your employees and the public with our Tier-1 ISP status.
- Streamline operations with our API bonds for quoting, ordering, inventory, ticketing and maintenance activity.
- Incorporate software-defined solutions.

Ensure Continuity of Operations

- Leverage Enhanced SD-WAN – Benefit from fully managed edge solutions with application-prioritised traffic, for even your smallest sites.

- Build resiliency – Zayo's massive fibre network will diversify and fortify your infrastructure.
- Add security – Zayo's network-integrated options include DDoS Protection, Firewall as a Service and Encryption.

Accelerate Collaboration & Cloud Services Adoption

- Choose any Cloud and SaaS Provider – Zayo directly connects to over 50 providers.
- Choose any connection to the Cloud – Fibre, Ethernet, MPLS, Internet or Wavelengths.
- Use your current assets while also migrating applications to hybrid (public/private) and multi-cloud systems.

OUR FIBER FUELS GLOBAL INNOVATION

CANADIAN FEDERAL & PROVINCIAL GOVERNMENTS

Networking Solution Overview

SERVICES TO BUILD YOUR FUTURE

DARK & LIT FIBRE

Secure and massive bandwidth growth with resilient connections to the USA and Europe

INTERNET ACCESS

Top 10 CAIDA ranked Tier-1 ISP with global reach

WANS

Ethernet, IP, and Enhanced SD-WAN for a fully managed edge-to-anywhere solution
