A Medical Center Prevents Future Cyberattacks with Zayo DDoS Protection

Customer: U.S.-based medical center

Challenge:

A DDoS attack shut down a medical center's operations and disabled its EMR system access meaning every patient had to be turned away

Solutions:

DDoS Protection

Results:

Zayo scrubbed the center's bandwidth and continued to scrub and divert malicious traffic until the attack ceased

Benefits:

Cost optimization: The average cost of a DDoS attack is $30,000 an hour

Improved security: Zayo's Security Operations Center mitigates attacks, blocking malicious traffic before it reaches the facility's network
