

# Simplify your WAN

Simplify your WAN while enabling employees to operate, share information, and access data securely, quickly and efficiently. With Zayo's E-LAN, **all of your global locations feel like they're on the same local network.** Zayo provides a straightforward way to **connect all of your business locations without building your own network.**

Allow IT resources to focus on your business and utilize existing assets while we manage the network. Zayo's E-LAN has the speed and security of your own private network – without the cost of design and operations. **Focus on your business priorities, and leave the networking to us.**

**Eliminate**  
core outages

**Aggregate** bandwidth  
across multiple sites

**Fully managed**  
service available

**40 Gbps** virtual  
circuits

## Zayo's WAN Technologies

	Site Access Bandwidth	Fully Meshed Core Network	Managed Service	Traffic Prioritization	Customer Handoff	CPE Provided	SLA Availability
<b>E-LAN</b>	Up to 40Gbps	✓	Managed Core	Yes - 4 Class of Service levels	Layer 2 Ethernet	NID Only	Up to 99.99%
<b>IP-VPN</b>	Up to 100Gbps	✓	Managed End-to-End	Yes - 6 Quality of Service levels	Layer 3 IP	Managed Router	Up to 99.99%

## Benefits of a Zayo E-LAN

### Performance & Flexibility

- Your network will be there when you need it: Zayo's self-healing MPLS network guarantees 99.99% core availability
- Easily integrate new locations into your network
- You define how your traffic is prioritized through the network

### Ease of Installation

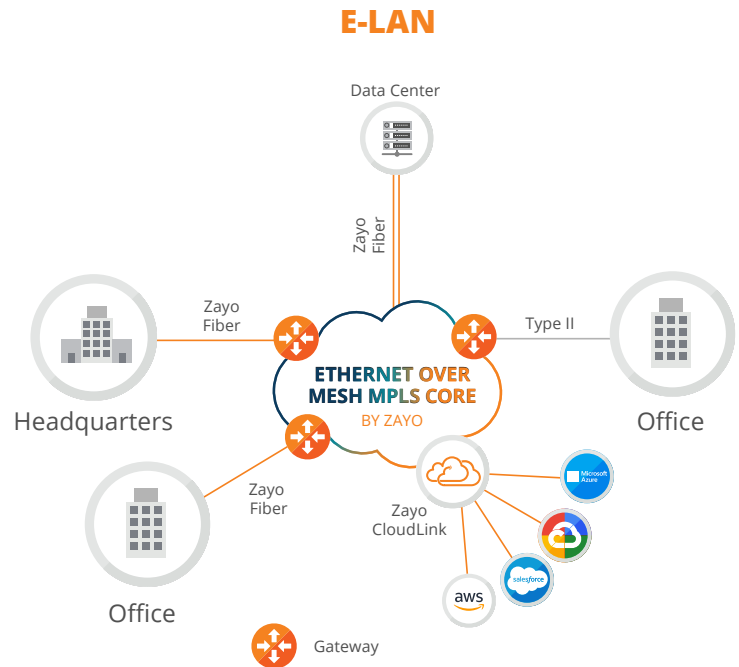

- A dedicated delivery specialist supports your project throughout implementation
- Zayo will manage the installation of all of your sites, including those that use our partners' type II services
- Software-configured virtual circuits on Zayo's core ensure fast additions and changes

### Ease of Management

- Lighten your IT load; stay in control of your routing while we manage your network
- Our secure, private WAN services are safe from external threats such as DDoS attacks
- Know when it's time to upgrade – our customer portal Tranzact provides bandwidth analytics
- Zayo's Network Operations Center (NOC) provides maintenance and repair 24/7/365

### Ease of Scale

- Easily add locations to your network and share central resources
- Upgrade bandwidth to speeds up to 40 Gbps
- Add Zayo's Tier-1 Dedicated Internet Access and low-latency CloudLink connections to your Zayo WAN allowing all sites to cost-effectively access your cloud provider

## We connect what's next.
