

OUR FIBER FUELS GLOBAL INNOVATION

ZAYO'S EDGE STATION FOR AUTONOMOUS VEHICLE TESTING

Product Overview

AUTONOMOUS VEHICLE TEST TRACK

The accuracy and safety of Autonomous Vehicles (AVs) requires massive and near-instantaneous data processing. New AV technologies address one element of ensuring reliable data – the processing power of the software. Public and private clouds address a second – secure data storage. Now, Zayo is addressing the third – groundbreaking automated network connectivity designed to enhance massive offloading of vehicle data.

Edge Station from Zayo is able to upload terabytes of data from AVs to their central compute location over our vast national Tier-1 network. These robust, rugged, outdoor data stations are specifically designed to efficiently and securely handle network uploads and downloads for autonomous test and production vehicles, eliminating the need for manual data transfer and surpassing the capabilities of WiFi and 5G.

Fiber enabled:

Transfer massive amounts of data exceeding 5G capabilities

Experienced:

Zayo serves more than half of the Fortune 100 companies including top automakers

Global:

Connect to 13M miles of fiber, providing diversity, reach, and protection

PRODUCT BENEFITS

Enhanced User Experience

- Conveniently connect vehicles to data centers or the cloud
- Works from data aggregation points near or far from market center
- Remote, secure, and automatic authentication streamlines user experience
- Near-instantaneous data transfer for processing or storage
- Dedicated UX/UI for closed-loop customer feedback on data upload and download

- The Edge Station brings turnkey networking as close to AV testing as is possible – full network connectivity is a fiber connection away
- We offer flexibility in network design and contract terms

Global & Metro Network Reach Delivers the World to You

- Zayo owns a premier Tier-1 network with more than \$1B in additional network expansion underway
- Zayo is the largest privately held fiber optic provider in North America
- Direct connections to 50+ Cloud and SaaS providers
- Strategic and unique routes across the globe

Work With an Expert in Transportation

- Zayo has deep relationships with automakers and serves more than half of Fortune 100 companies for fiber based connectivity
