

Simplify your WAN

Companies worldwide have solved their communication challenges. Their employees operate efficiently, share information readily and access data securely. **They have implemented a Zayo IP VPN - a secure and private WAN solution that connects all business locations.** It's a straightforward way to bring your employees together without building your own network.

With an end-to-end managed IP VPN from Zayo, you'll have the foundational platform for growth. Our solution provides the speed, performance, scale and security of a private network – without the cost of do-it-yourself design and operations.

**Connect
thousands
of locations**

**Eliminate
core outages**

Fully managed
service
available

Ability to
**prioritize
traffic**

100 Gbps
global virtual
circuits

The Zayo Network | **Connecting What's Next**

Zayo's WAN Technologies

	Site Access Bandwidth	Fully Meshed Core Network	Managed Service	Application Traffic Prioritization	Customer Handoff	CPE Provided	SLA Availability
E-LAN	Up to 40Gbps	✓	Managed Core	Yes - 4 Class of Service levels	Layer 2 Ethernet	NID Only	Up to 99.99%
IP VPN	Up to 100Gbps	✓	Managed End-to-End	Yes - 6 Quality of Service levels	Layer 3 IP	Managed Router	Up to 99.99%

Benefits of a Zayo IP VPN

Performance & Flexibility

- Your network will be there when you need it: Zayo's self-healing MPLS network guarantees core availability up to 99.99%
- Connect your entire network to the Cloud, no matter where: a single virtual CloudLink circuit is all you need
- You define how your traffic is routed: Our 6 quality of service levels allow you to prioritize how your applications travel across your network

Ease of Installation

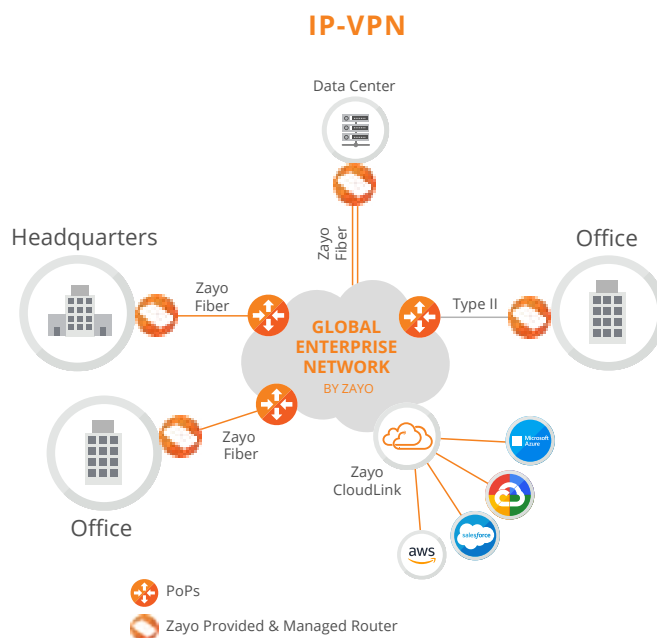

- You'll have a dedicated delivery specialist supporting your project
- Zayo will manage the installation of all of your sites
- Software-configured service ensures timely additions and changes

Ease of Management

- Lighten your IT load; we manage your network, right up to and including the Zayo-provided customer edge routers
- Your private IP VPN is safe from public network threats such as Distributed Denial of Service (DDoS) attacks
- Understand your traffic use and manage your network services with our customer portal Tranxact
- Support around the clock: Zayo's Network Operations Center (NOC) provides maintenance and repair 24/7/365

When it's Time to Grow

- Easily add locations to your global network without interrupting existing connections
- Easily add bandwidth as well; Zayo offers speeds up to 100 Gbps
