

As logistics companies face the growth of eCommerce and omni-channel delivery, there is an increased urgency to tackle the challenges of automation, logistics optimization, new regulations, and inclusion of 3PL services. These types of business challenges require a network up to the task.

Zayo's robust fiber-based network, Tier-1 Internet access, and Software Defined Network solutions can help modernize and equip the Transport Sector to meet

these challenges. We will scale and secure your network, reducing deployment and upgrade timelines, positioning you to fully leverage IoT, Data Analytics, and new Cloud-based solutions, while controlling data exposure to customers. Our services offer a simple, flexible, and cost-effective solution to logistics challenges.

Tier-1 Global IP backbone

370+ Global cloud on-ramps
across **50+** cloud
services providers

~1,300 On-net data centers

35 Countries served

FLEXIBLE SOLUTIONS TO OPTIMIZE YOUR OPERATIONS

Logistics Demand a Modern Infrastructure

- Securely network your IoT devices, sensors, robotics, EV charging stations, and vehicles with Zayo's private IoT and 5G solutions.
- Prepare for the massive data flows of Autonomous Vehicles with up to 400 Gbps fiber links.
- Route your IoT data securely to AI and machine learning services for logistics optimization.
- Incorporate Enhanced SD-WAN capabilities, adding managed edge solutions with security, flexibility, application assurance, and insight to your network.

Enhance Continuity of Operations

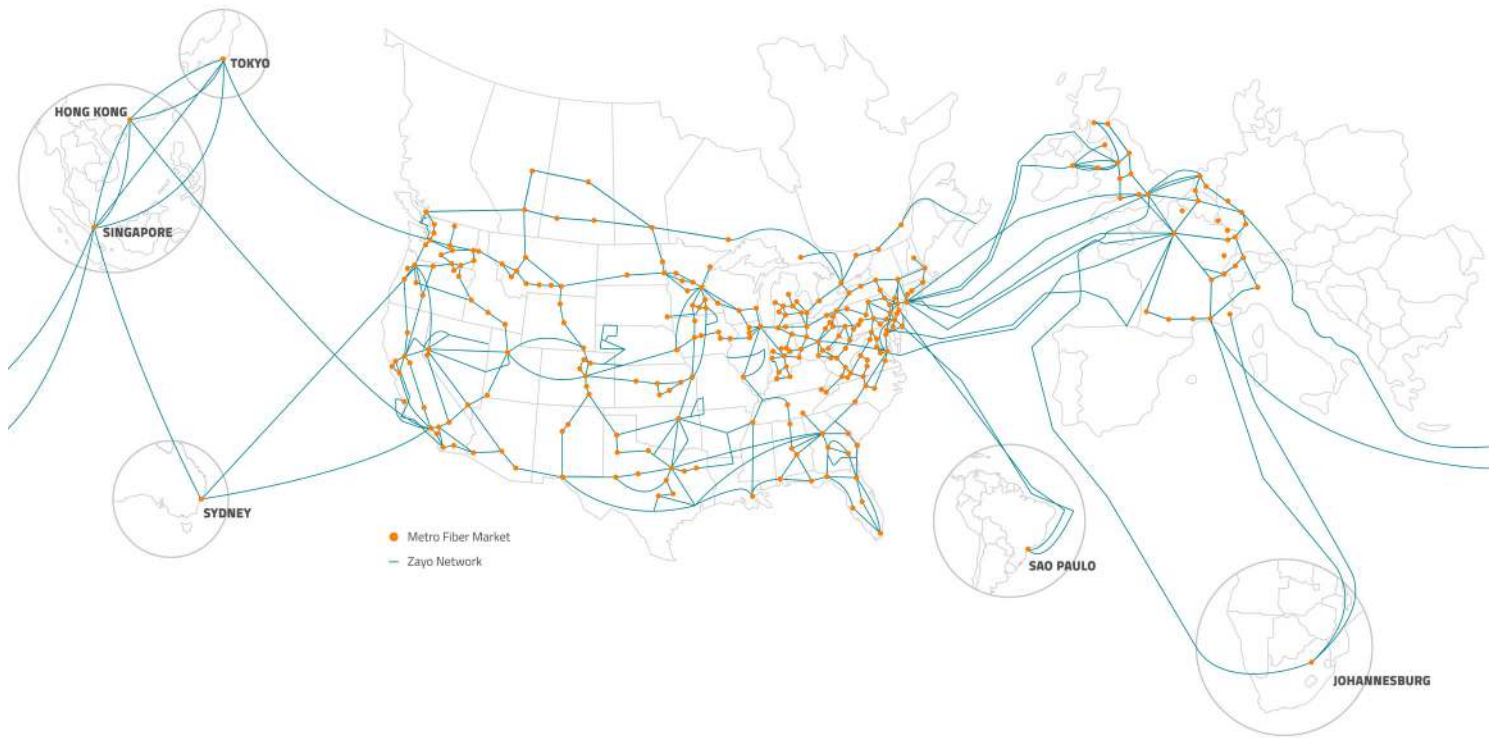

- Build resiliency: Leverage Zayo's unique and expanding fiber services to diversify and fortify your network globally.
- Protect your small sites' data: Use simple Internet Access and Zayo's Enhanced SD-WAN intelligent traffic routing to ensure the best user experience.
- Add security: Protect your operations and your customers' data from cyber attacks with our next-gen network based security services.

Maximize Cloud Effectiveness

- Improve and secure cloud performance with private, direct, secure connections to 50+ cloud service providers and 1,300 on-net data centers.
- Control your robots and automation using Zayo's low latency regional bandwidth to access edge computing cloud resources.
- Easily migrate from legacy solutions to hybrid (public/private) and multi-cloud systems.

Delight Your Customers

- Ensure your customers get lightning fast response times accessing your apps and tracking data by leveraging Zayo's low latency, Tier-1 Internet backbone.
- Keep mission critical applications running – Zayo's Enhanced SD-WAN prioritizes your key business processes and uses AIOps with proactive maintenance for increased uptime.
- Access flexible and scalable network solutions from Zayo to meet your ever changing business needs.

SERVICES TO BUILD YOUR FUTURE

DARK & LIT FIBER

A cost-effective solution for massive bandwidth growth.

INTERNET ACCESS

From a Global Tier-1 ISP with end-to-end connectivity and peering reach.

WANS

Ethernet, IP, and Enhanced SD-WAN for a fully managed edge-to-anywhere solution.

PRIVATE NETWORK

Secure, custom on-site private IoT and 5G networks for connecting IoT, vehicles, and people.

CLOUDLINK

Enhanced performance, scale, and security for your cloud applications.

DDoS PROTECTION & FIREWALL SERVICES

Protect against sophisticated, inevitable, and potentially crippling cyber attacks.
