

Max UC | Voice & Collaboration

zayo[®]

Effortless Cloud Communications at a Fraction of the Price

Provide a Professional Experience When Your Customer's Call is Critical

Every business deserves top-notch communication features and best-in-class customer service. Zayo's Max UC delivers an industry-leading phone system at an affordable price.

The Last Phone System You'll Ever Need

Zayo's Max UC is a cloud-based, Voice-over-IP phone system that delivers superior capabilities at a fraction of the cost of traditional phone systems. From equipment to installation to training, the system offers all the features you need, some you didn't know you wanted, and an administrative portal that allows you to manage it all.

The Many Benefits of Zayo's Max UC

An Easy, Intuitive System

Pay attention to the things that matter - your business - and let your phone system just run. Max UC is easy to deploy, maintain, and doesn't occupy space. Admins and users easily control Max UC from any web browser, and can change features with a click of a mouse.

Low Cost

No surprises. A low upfront cost and bundled monthly price includes everything - phone system, calling, and equipment.

The Zayo Network | **Connecting What's Next**

Complete Mobility, from Desktop to Laptop to Phone to Tablet

Never miss an important call. From any Internet-connected device:

- Max UC provides embedded multi-device capabilities, with internal and mobile devices fully integrated with the system. Your clients and associates have a single number to call. You answer from any device.
- Employees see the real-time presence and availability of colleagues with their desktops or mobile devices.
- Remote and in-office workers always have the in-office collaborative experience from anywhere, at any time. This includes making and receiving calls, seeing the availability of colleagues, instant messaging, video chat, transcriptions for voicemail messages and much more.
- Max UC integrates with Windows, Android and iOS, and works with 4G, 5G and WiFi connectivity.

Management at your Fingertips

An easy-to-use web portal allows your company's central administrator(s) to control phone settings for your business. Individual users can use the portal to manage their extensions and IP phones.

Immediate Response

When emergencies and outages occur, Zayo has a leg up - we own the multiple, physically-separated data centers that host Max UC, so we can respond immediately if service is impaired.

Security for your Data

When voice is data, we need to ensure its security and privacy. We safeguard your sensitive information with our industry-standard security and privacy measures.
