Zayo

OUR FIBER FUELS GLOBAL INNOVATION

METRO DARK FIBER

Product Overview

Enterprises are faced with numerous challenges in the increasing virtual environment: transporting massive amounts of data between key locations within a market; sustaining optimum performance; ensuring maximum network security – all while maintaining operational control.

Zayo's Metro Dark Fiber provides the solution. Zayo extends our expansive Dark Fiber infrastructure directly into your locations. From there, you take complete control: add your equipment to light and manage the fiber.

Zayo has built **8.7M miles of fiber in metros across the globe**

Over half of Fortune 100 companies choose Zayo for **fiber transport**

9 of the **10 largest telecom carriers** rely on Zayo's Metro Dark Fiber

PRODUCT BENEFITS

Virtually Unlimited Capacity & Scale

- Dark Fiber is only limited by the equipment you choose and install.
- Leverage Zayo's large fiber counts for real-time data transfer between critical locations.
- Accommodate your bandwidth growth quickly and on your terms; only a simple equipment update is required.

Network Control & Security

- Maintain complete control of the fiber: Zayo hands it to you dark and you light it.
- Zayo provides full path transparency; you know the exact route and are able to create diversity to maximize uptime and minimize latency.
- End-to-end protection with a network 100% dedicated to you; no components are shared with other Zayo customers.

Cost Savings - Today, and as you Grow

- Dark Fiber seamlessly plugs into your existing equipment, becomes part of your Metro Area Network (MAN) and reduces costs.
- As your bandwidth requirements increase, add capacity by installing a new card on your existing equipment rather than ordering individual wavelengths.
- With Dark Fiber to your locations, you have the foundation to connect to Zayo's full portfolio of higher level networking services.

Industry Leading Performance

- Zayo dedicates project management resources to every installation.
- Zayo dedicates field technicians to maintaining Dark Fiber in every market.
