

The Euronext Equities Exchange is relocating its primary data centre from London to the Aruba Global Data Centre IT3 in Bergamo, Italy in Q1 2022.

Zayo is taking advantage of this opportunity to review our entire Milan network – increasing coverage, diversity, and latency. As Italy’s financial and economic hub, and a top 10 data centre market in Europe, our investment in Milan will expand our reach to a number of new facilities preparing us to competitively serve customers.

In addition to increasing our coverage and capabilities in the area, we are studying the market to understand the needs and expand our capabilities as opportunities arise over time in this growing market. Let us stand up your network, so you can focus on your core business.

Fully diverse ring in the Milan area, and diversity to the rest of Europe

Ready for service before Euronext goes live

Up to 100G Wavelengths available now, 400G coming soon

BENEFITS

Local & Global Connectivity

- Test your link before Euronext’s opening
- Gain access to 390+ 100G Wavelength sites on Zayo’s global fibre network
- Connect to more than 400 global markets across Europe, Asia, North America, and Latin America
- Seamlessly connect to trading locations in Frankfurt, Zurich, London, New York, Chicago, Tokyo, and more on Zayo’s extensive exchange network with Low Latency routing

Flexible Diverse Service

- Choose your capacity: Enable incremental capacity options, up to 100G, and soon 400G
- Choose your diversity: Utilize all the major data centres with multiple diverse routes
- Choose your service: Zayo offers Wavelengths, Ethernet, Direct Internet Access (DIA), and Private Networks all with direct and diverse options
- Choose your end-points: Zayo can extend our fibre directly into your buildings for a single-carrier customer experience

ARUBA - ROUND TRIP LATENCIES
