

Zayo is Going Local with New Regional Architecture

Property Manager Overview

Offer your tenants the most advanced Fiber Internet available

**Improve and modernize your properties
with the right fiber connectivity:**

**Attract and
retain tenants**

**Offer the fastest
Internet available**

**Simplify telecom
for your tenants**

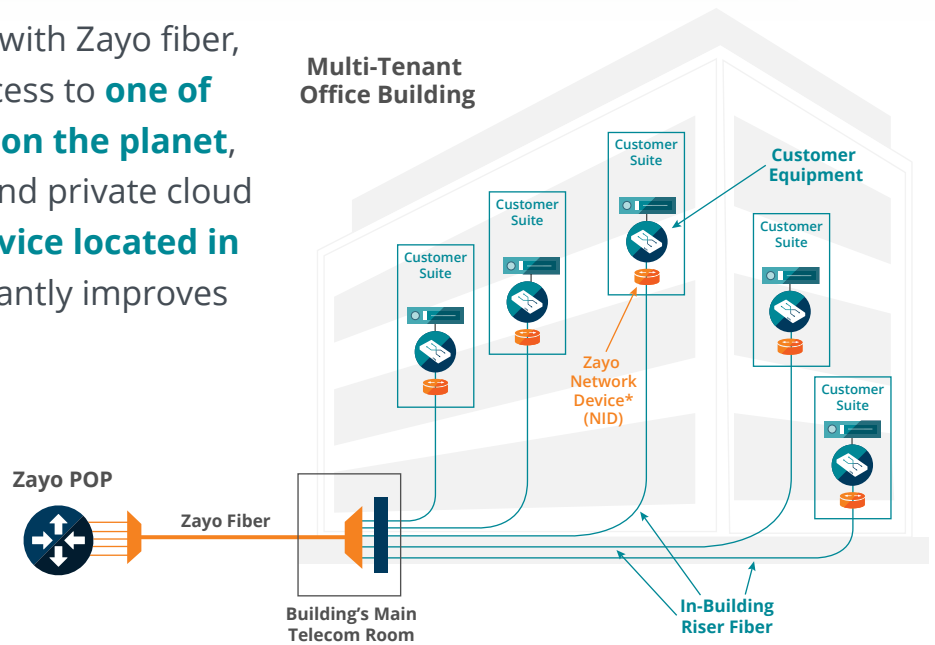

When your building is equipped with Zayo fiber, your tenants will enjoy direct access to **one of the fastest Internet providers on the planet**, protection from cyber attacks, and private cloud connectivity, all over a **single device located in the customer's suite**. Zayo instantly improves your properties.

About Zayo

Zayo is your networking partner. We provide mission-critical bandwidth to innovative and growing companies, over a massive global fiber network. In fact, the largest providers in the world buy their bandwidth from us. They rely on Zayo's high-performance solutions and global reach to move, process, and store enormous volumes of data. Now you can too.

Benefits

Enhanced Building Networking

- Zayo offers a global fiber network for your tenants' global communications needs
- With Zayo, your tenants have better speed, quality, scalability, reach, and control
- We'll provide dedicated Internet capacity for each tenant - no oversubscription means they always have the bandwidth they pay for

Are you thinking about 5G?

- With over 10 years' experience in fiber-enabled wireless networking, we can move you to 5G
- We are fiber construction licensed with a strong jurisdictional approval track record
- We've gained permitting for over 130,000 miles of new fiber – we'll get your fiber in quickly

Work with a Networking Partner

- We're trusted by the world's biggest brands in entertainment, healthcare, biotech, fintech, computing, transportation, education, and more
- We are more than just a vendor – we're entrepreneurs who create flexible, agile, and innovative solutions
- Your tenants will be able to manage, move, process, and store massive volumes of data with Zayo
