

Secure Service Edge

zayo

EDUCATION

Secure Every Connection, Protect Every User.

Zayo Education recognizes the growing responsibility that educational institutions and libraries have to protect their data, devices, and users. With students, teachers, and staff accessing private resources and applications remotely or from any campus on various devices, traditional security measures are no longer enough.

Secure Service Edge (SSE) is a cloud-based security solution that provides device-specific unified protection against cyber threats without the need for physical hardware. It offers centralized control over security policies so every device, user, and data source is protected from internal and external risks.

Key Features:

Simplified Security: SSE reduces the requirement for on-premise advanced security appliances, simplifying your school or library security setup. It protects users and data wherever they are – on campus or remotely – reducing the strain on IT resources.

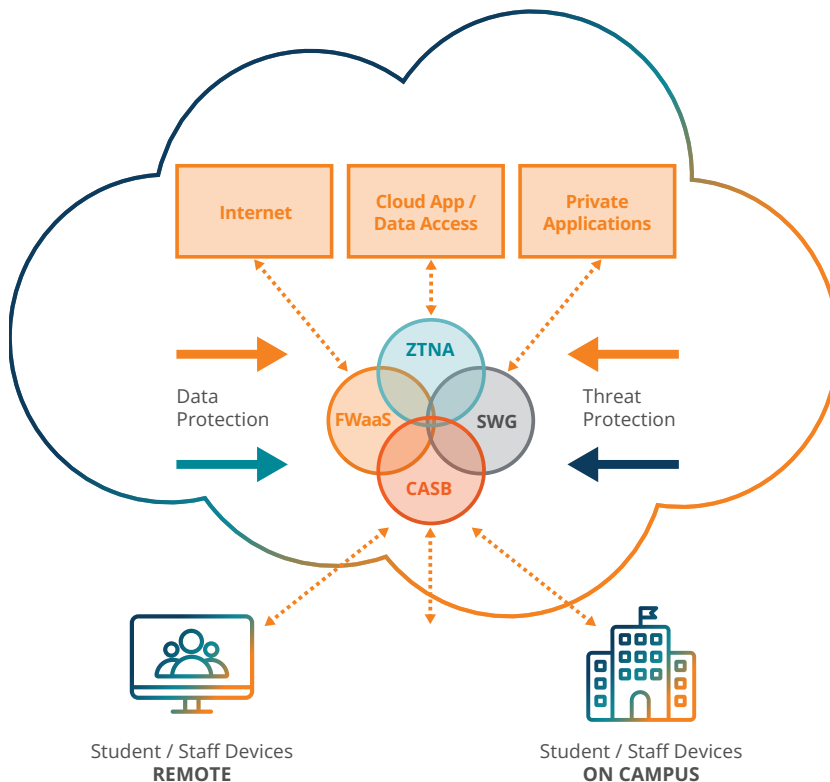

Cloud and Internet Safety: SSE monitors cloud and web activity protecting against online threats with customized authorization and access policies.

Centralized Policy Enforcement: Gain control over who can access what, filter content, and apply acceptable use policies, even when different users need varying levels of access – this level of security is maintained even after you've left school and are remote.

Ongoing Protection: Zayo continuously helps you update security policies to keep up with ever-evolving cyber threats, managed by experts reducing the need for additional IT staff.

Zero Trust Network Access (ZTNA)

Secure remote access

Firewall as a Service (FWaaS)

Secure IoT and machine to cloud traffic

Cloud Access Security Broker (CASB)

Cloud usage compliance

Secure Web Gateway (SWG)

Safe web browsing

Why Zayo Education?

Education Obsessed, Network Enabled. We understand the unique challenges educational institutions face and are committed to providing solutions designed specifically for your needs.

- **Tailored Onboarding:** We customize your setup to fit your institution or library needs from the start.
- **A team of security experts:** Our team helps your staff from onboarding to ongoing security optimization so your network is secure, efficient, and always performing.
- **Always On Support:** Dedicated Service Assurance team to Zayo Education managed services provides tailored 24/7/365 support.
- **Vendor Flexibility:** We work with top security vendors to give you the best-tailored option without locking you into a single provider.
- **Education-focused Partner with E-rate Expertise:** Choose a partner with proven expertise in navigating the needs and nuances of Education. Zayo, the largest E-rate service provider, connects over 19,000 K-12 schools across the U.S. Elevate the full potential of your students and educational institutions.

Zayo Education's SSE solution can be covered by the FCC Schools and Libraries Cybersecurity Pilot Program.

Learn how we can help simplify your security and keep your organization safe, no matter where you are at zayo.com
