

Direct connectivity between the U.S. and Tokyo has seen growing demand from a wide range of applications across multiple industries in recent years. Zayo is meeting this demand by significantly investing in our fiber reach and capacity. We offer diverse and high-bandwidth connectivity to our customers, wherever their business takes them.

Zayo’s fiber network to Tokyo will connect your critical business locations securely, and help you grow into Asia’s highest-demand markets.

Pre-provisioned capacity to critical Tokyo data centers for fast service delivery

Full diversity between US and Tokyo for protection and backup

Fixed routing for consistently reliable performance

BENEFITS

Service Assurance

- Dedicated project management ensures a quick and predictable installation of service.
- Our dedicated NOC and service management teams are available around the clock, actively managing for consistently stellar performance.
- Zayo’s dedicated field technicians continually monitor the route to prevent outages.

Global to Local Connectivity

- Seamlessly connect to trading locations in Chicago, London, Tokyo, Toronto, New York and many more markets on Zayo’s extensive global network.
- Zayo’s metro fiber extends your subsea route directly into your offices, data centers and cloud service providers, end-to-end.

Flexible Diverse Service

- **Choose your diversity:** Connect major data centers with multiple diverse routes.
- **Choose your capacity:** Enable incremental capacity options, up to 100G.
- **Choose your installation date:** With pre-provisioned capacity and a dedicated installation team, go to market within a matter of days – not months.
- **Choose your service:** Wavelengths and Ethernet services are available to Tokyo. Zayo also offers Dedicated Internet Access (DIA), Private Networks, Dark Fiber, and many other services to design a strategic network that propels your business.
