

# Stop Inappropriate Content—Start Learning and Start Discovering

**A content filtering solution made for schools and libraries, with input from schools and libraries.**

Zayo Education, previously ENA, has been providing cost-effective, cloud-based content filtering since 1998. We have listened to customers' needs and incorporated their priorities, resulting in a powerful and flexible solution that maximizes security, provides customers with the tools they need to ensure CIPA compliance, and minimizes administrative burden—all while putting school districts and libraries in the driver's seat.

## You have complete control.

Our content filtering solution's popular and proven Authorized Override service continues to offer authorized administrators and educators the ability to bypass category restrictions.

Our comprehensive content filtering solution enables school districts and libraries to choose which content categories to block or allow (there are over 50 categories that organize websites by subject matter), to input specific websites for whitelisting or blacklisting override, and to view and download utilization reports.

## Zayo's next-generation content filtering solution gives schools and libraries:

- A proven solution that's extremely fast, scalable, and flexible—our fastest filtering engine yet!
- Complete control over your filtering policy including customized blocking
- Cloud-based content filtering
- A robust safety net for students while giving them access to the valuable learning opportunities of the Internet
- The ability to comply with CIPA while respecting user decisions and first amendment freedoms

## Features include:

- Authorized Override functionality and online administration
- No need to purchase or maintain any premises-based equipment
- Complete online, real-time control of category selection, as well as blacklists and whitelists
- Bulk add URL overrides individually, or in multiples, easily and conveniently via manual entry, copy/paste, or CSV file import
- Robust admin controls, analytics, and reporting
- Export report data to a CSV file for all report types
- Customer management of HTTPS filtering on port 443

**Contact your Zayo account service manager for more information.**

## Content filtering on-the-go.

### This new service:

- Saves bandwidth – doesn't use your Internet access when devices are off-site
- Has flat, per device pricing so you know exactly what to budget for
- Is easy to deploy
- Works with devices that support global proxies

### To set up your devices to work with our mobile filtering solution, your MDM or device configuration system should:

- Configure proxy credentials on the devices
  - Optionally provision a PAC (Proxy Auto Config) file on the devices
  - A PAC file allows devices to bypass sites that are not "proxy friendly"
  - Can also keep local traffic on-net so it doesn't have to proxy out to be filtered
- 

## About Zayo Education

In 2022, Zayo, the largest independently owned fiber network in North America, acquired Education Networks of America (ENA), a top-five E-rate service provider involved with the E-rate program since its inception in 1996. Zayo empowers some of the world's largest and most innovative organizations to connect what's next. The Zayo group of companies connects 400 global markets with future-ready networks that span over 18 million fiber miles and 145,000 route miles. Zayo's tailored connectivity solutions and managed services enable carriers, cloud providers, data centers, schools, and enterprises to deliver exceptional experiences from core to cloud to edge.
