

Spread Ultra Low Latency Route

The Fastest Connection Between New York to Chicago

Tap into the most direct, lowest latency connection between two of North America’s most important financial markets and economic hubs.

Zayo’s Spread Route offers the most direct path between New York and Chicago. Built on modern fiber and mostly underground, this route is secure, reliable, performant, and the fastest on the market connecting these locations.

Zayo is **1 of only 3 companies** to own and operate fiber between NY and Chicago

Zayo **guarantees diversity** with primary, secondary and tertiary routes

Zayo is the **only provider with a NOC, dedicated to this route,** operating 24/7/365

Benefits:

Reliability & Management

- 99.999% uptime, proven by Zayo’s historical performance
- Our dedicated NOC and service management teams provide 24/7/365 route oversight, combining active access management to ILA sites with Zayo’s specialized field technicians conducting continual fiber monitoring

Local & Global Connectivity

- Connect to offices, data centers, and cloud service providers via Zayo’s metro fiber
- Access to several local markets along the route
- Zayo’s extensive fiber network reaches over 400 global markets

Flexibility By Design

- Diverse routing offered to the North and South of the Spread route
- Use Zayo Dark Fiber for maximum security and ownership or lit fiber
- For higher bandwidths, tap into 400G-enabled, non-ULL systems on the route
- Go to market within days with ready-built capacity and a dedicated installation team
