### **SERVICE AREA MAP**

Maps of the exchanges where the Company is authorized to provide service are filed with the California Public Utilities Commission. These sheets are not contained within copies of this Tariff, but are available for public inspection at the following location:

California Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, California 94102

## TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a) i.
  - 2.1.1.A.1.(a) i.(1)
  - 2.1.1.A.1.(a) i (1)(a)
- D. **Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff with a cross- reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by and asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

#### **3.7. CUSTOM CALLING FEATURES, Continued**

##### **3.7.1. Feature Descriptions, Continued**

###### **Call Waiting**

With this feature, an incoming call encountering a busy station receives audible ringing, while the called, busy station receives a call waiting tone. This feature **will not** work with hunting.

###### **Caller ID on Call Waiting**

###### **Distinctive Ring**

Distinctive Ring Service assigns up to three additional phone numbers to one access line. Each assigned number has a distinctive ring.

###### **Single Number Service – Simultaneous Ring**

An incoming call rings Customer's line and one additional number simultaneously. Customer activates and deactivates the feature by dialing a "star" code on their handset. If a simultaneous ring number is non-local to customer's Zayo line, Customer will be assessed toll charges on their Zayo line for the duration of the call when they answer an incoming call on the non-local simultaneous ring line.

###### **Single Number Service – Sequential Ring**

#### 3.7. CUSTOM CALLING FEATURES, Continued

##### 3.7.1. Feature Descriptions, Continued

###### **Hunting**

This feature will route a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the Customer's main telephone number and several telephone lines, so that the Customer may receive calls on several lines, although all calls are placed to the same number. This feature is often used on multi-line telephone sets or key systems.

Hunting **will** work on the same line as Call Forward Variable and Call Forward Don't Answer Features.

Hunting **will not** work on the same line as a Call Forward Busy Feature as they are essentially the same feature both are activated only when the line is busy.

Hunting **will not** work on the same line as Call Waiting.

1. Circular - Circular hunting hunts all lines in the hunting group regardless of the starting point.
2. Multi-Line - Feature allows all of Customer's line to reflect the same local telephone number and name for outbound Caller ID. Incoming calls first hit the main number, and then hunt to the member numbers. Incoming calls cannot be placed directly to the member numbers. All toll and local usage incurred by member numbers will be billed on the main number.
3. Series - Series hunting hunts for an open line in the order that the Customer designates. Unlike Circular hunting, series hunting will stop and give a busy signal or forward to voice mail at the end of the hunting sequence.
