A future-ready network where you need it

Are you ready for the bandwidth you'll need tomorrow?
We are.

The right network matters – and Zayo's network allows you to:

Process **huge amounts of data**

Build strategic **cloud connections**

Have a flexible **hybrid working environment**

Secure your transmissions

Prepare for **the future**

Why the
Network Matters

The Right Network Performs Better

✔ We offer diversity to reduce outages

✔ We build 100% underground routes - when fiber is buried, it's protected

✔ Intelligent architecture reduces network touches and human errors

✔ "Call Before you Dig" process protects fiber in construction zones

The Right Network Enables your Growth

✔ Bandwidth Growth: virtually unlimited bandwidth growth opportunities

✔ Geographic Growth: reach key markets and the remote edge

✔ Density Growth: Connect diversely into data centers worldwide

The Right Network is Secure

✔ Underground construction physically secures fiber

✔ Network based security protects against cyber attacks

✔ Dark Fiber offerings privatize customer data security

Zayo is the Right Network

✔ Zayo expands our fiber to meet existing and anticipated customer demand

✔ Express routes improve the customer experience

✔ We guarantee the performance of the services we provide over this network

Powerful, trusted, secure and agile.

400+
metro markets

800G
transmission record

60+
400G enabled routes by end of 2023

#1
Largest independent metro and long haul fiber provider
