

Gain the Zeus Advantage

Zeus Subsea Route - Unique Low Latency Option

Zayo's new uniquely designed, double armored, resilient subsea fibre route. Completed in July 2022, Zeus provides a direct, low latency connection between the United Kingdom and the Netherlands with bandwidth up to 400G.

Complex digital transformation, exponential data growth, emerging technologies, global expansion and the proliferation of cloud computing - now more than ever, enterprises need resilient, diverse communications infrastructure with bandwidth available on-demand.

Key Route Stats

**10G, 100G
400G**

Bandwidth options

Unique Low latency

Between London and Amsterdam

Double-armored Cable

Buried
2 to 3 metres deep

5.2 Petabytes (Pbps)

Full cable capacity

Benefits

Zeus Connects Your Key Locations

- Direct path across the North Sea for a low latency option
- Purposely built to connect with 10 primary Cloud on-ramps and 80+ data centres between these key Tier-1 markets
- Provides contiguous low loss, cutting edge G.652.d or G.654 fibre from Dublin, through London and Amsterdam, all the way to Frankfurt

Unmatched 24x7 Monitoring for Superior Availability

- Guard vessel on route protection duties
- Zayo NOC monitoring with European dedicated NOC
- Satellite asset monitoring
- Continuous OTDR monitoring to identify fibre light faults in real time
- Electric path monitoring to ensure electrical integrity
- Ongoing environmental monitoring to ensure healthy cooperation with surrounding fisheries

Highest Levels of Reliability

- Leverages "Ultra Low Loss" fibre, the industry's newest and most advanced
- Zeus has priority maintenance: 1 day transit time; 6 day repair targets
- System spares strategically placed for easy and quick access
- Full subsea and terrestrial diversity from the existing Circe North route
