

Implementing a Total Experience

THE NEW

Hybrid Work Model

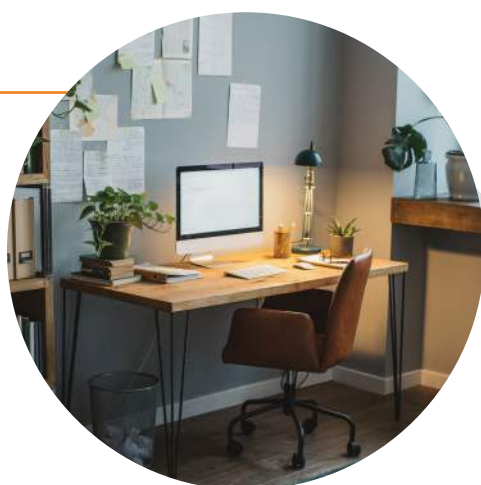

Total Experience

The Great Resignation has forced organizations to *reprioritize around employee experience*, not just customer experience. The new hybrid reality requires more than just remote work tools; *it requires an integrated, holistic solution.*

Technology is a touchpoint for employee experience; having the right tools is essential for crafting a connected work environment:

- > visual collaboration
- > collaborative work management
- > desktop-as-a-service
- > digital experience monitoring
- > hybrid meeting solutions

WORK SPACES

WORK EXPERIENCES

It's about how you implement it:

1 in 5

employees either don't have or haven't been trained on the right remote work tools for the job.

75%

of workers say they waste 3 to 5 hours a week on poor collaboration

It's not just WFH or WFO.

The new spheres of hybrid work:
